# WHAT'S INSIDE

We don't just make great attachments, we use them too. We are family-owned and operated and have been since we got our start. The quick story is we are based in Washington State where most of our products are manufactured and assembled.

Rest assured that our attachments are built by operators, for operators.

This catalog is designed to show you our latest products going into 2018. We want to make sure that you have the right tools for your upcoming projects. For detailed specs, quotes and pricing, please contact our sales line or talk with a rep at one of our events.

We look forward to hearing from you. Thank you for your business and consideration.

# BEACH MASTER BEACH SCREENER

# ETERRA

**CALL FOR PRICE - 360.203.7730**

Great for ocean or lakefront beaches,  
horse arenas and more.

## ABOUT

The Eterra Beach Master is an excellent tool for sifting through sand or light material and screening out hazardous debris or just plain garbage. From cleaning up Hawaii's scenic beaches, to removing cigarette butts, glass, rocks and sticks from lakefront properties; it's a safe bet to rely on the Beach Master to be a fast and efficient light material screener.

## FEATURES and BENEFITS

- A cost effective solution to beach cleaning compared to a dedicated machine
- Collect small debris easily
- Great for resorts, private beaches, playground maintenance, sports fields and race tracks
- Compact enough to get into small areas
- Hydraulically controlled depth setting
- Hydraulic dumping hopper
- Sealed self lubricating bearings
- Quick and easy to attach
- Easy to maintain
- Control systems available for all major skid steer & compact track loaders including Bobcat 7 pin control
- 2 screens supplied for fine and course beaches
- Optional Drag Bar Finisher available upon request (depending upon availability)

## MIX 'N GO CEMENT MIXER

MIX 'N GO  
600

21 Cu. Ft. Capacity

### ABOUT

In 2015, the Eterra Mix 'N Go Cement Mixer became a huge hit in North America with over 100 units sold in under 18 months. These cement mixer attachments work excellent on Skid Steers and Compact Track Loaders and have become one of the top solutions for small batch cement mixing.

NEW to the line is the Mix 'N Go 600 Cement Mixer attachment for Skid Steers, Compact Track Loaders and Telehandlers. Featuring a massive 21 Cu. Ft. mixer bucket, the 600 has the strength and capabilities to mix and pour massive amounts of cement quickly, efficiently, and accurately.

If you need to mix cement for an upcoming job, we have the tools you need...

Chain Specifications

Shark 70/30

The Eterra 4 Foot Trencher for skid steers is ideal for constructing long industrial or personal property trenches with ease.

2316 E Bakerview Rd.. Bellingham, WA - 360.203.7730 - [sales@eterraattachments.com](mailto:sales@eterraattachments.com) - [eterra-usa.com](http://eterra-usa.com)

# ***CLEARING MOWER***

***Extreme Duty Push B***

***Open or Close Front***

***NEW  
PRODUCT  
2018***

## ***FEATURES AND BENEFITS***

- Only USA Made Permco hydraulic gear driven motors are used (Optional Piston Motor Upgrades Available)
- Select between two dynamic brush cutter sizes (60" or 74") depending on your machine's capabilities and your operating needs
- The blade holder is made of T1 grade steel and CNC machined for precise mower balance
- Utilizes 1/4" high strength structural steel (double reinforced stress points)
- Tubing used is 3" x 4" high strength structural steel tube that is fully integrated into the mount plate. This allows for a maximum transfer of force when cutting through thick trees or pushing them down
- Direct drive system: No wear parts, bushings, or additional gears that can wear out
- High quality bearings and exclusive viton shaft seal (double guarded seal for increased protection against contamination and abrasion)
- Replaceable skid shoes and removable blade cover for enclosed or open cutting. Using enclosed housing when protecting surroundings from debris is critical
- Anti-kickout feature on the front opening of the mower (serrated edge) provides grip when in intimate contact with trees
- Vision friendly 1/2" Lexan shield and window that is bullet resistant and meant to protect the operator without sacrificing visibility
- Polyester powder coat finish gives this mower a glimmer and great protection against the elements

## Excavator Rotary Mower Line

**ETERRA**  
CALL FOR PRICE - 360.203.7730

### ABOUT

The Cyclone Rotary Mower's ideal use is for clearing brush and trees from roadsides and acreages where speed and removing obstacles without slowing down is most important. Clear driveways, ditches, and much more. There isn't another excavator rotary mower featuring this much versatility and performance.

Eterra has a reputation for building the strongest and highest quality flail and sickle bar mowers found anywhere. When we designed, engineered and tested our Rotary model, we knew we had something special that operators were going to love.

#### The Cyclone.

## 3-Point Systems

**ETERRA**  
CALL FOR PRICE - 360.203.7730

Gone are the days of jockeying in and out of your skid steer to connect your agricultural attachments. The Eterra 3-Point adaptor allows you to connect tractor 3-Point implements with ease.

### SPECS (ET-3PT-200 - HI FLOW)

**Weight (LBS):**

450 lbs

**Motor HP Rating:**

40-58 HP

**Category 1 Arms (IN):**

7/8" Hitch Pins

**Category 2 Arms (IN):**

1-1/8" Hitch Pins

**Lift Arms:**

Adjustable

**Back Plate:**

Heavy Duty Dual Plated 1/4" Steel

**Hydraulic Flow Rating (GPM):**

32-40 GPM @ 4000 PSI

### FEATURES

- 55 HP motor with integrated 1 & 3/8" PTO shaft
- Auxiliary Output: 32 - 40 GPM at 4,000 PSI
- Adjustable lift arms to fit Category 0, 1 and 2 agricultural attachments
- Rotating motor mount to line up your PTO shaft (Extends the life of your U-Joints and maintains your horsepower)
- Quick Hitch allows you to attach from within the cab (No jockeying in and out)
- Bypass circuit that protects your attachments from damage
- Modular design allows for motor swapping and other linkage changes (because an attachment like this has to be dynamic)
- Case drain included with purchase

## **ABOUT**

The RT-20 Boom Mower System or better known as the “Raptor” is the first industrial boom arm with universal applications for Skid Steer loaders. The RT-20 is the third generation model that incorporates 20 years of boom arm and control technology. This attachment system is built to perform, and provide the operator with an all-in-one solution for roadside and trail clearing. With the articulating head rotating up to 210 degrees and the boom swing surpassing 180 degrees, there simply isn’t a place this mower system can’t reach. Contact an Eterra representative if this attachment system can help progress your projects and business.

## ***FLAIL MOWER***

### ***ABOUT***

The open face and deep cutter design of Eterra flail mowers make them extremely useful for roadside mowing and acreage clearing. Cut the toughest of brush and maintain roadside grass areas with ease, or clear land for a new property development. The options are endless, and with a 6" cut capacity, the power and speed is outstanding. After owning an EX-30, you'll realize that in thick vegetation and on roadsides, you won't find yourself in need of a mulcher much at all. Our mowers are mated to the machines they go on, which means we've eliminated the worry of tipping and hydraulic bog-down due to hydraulic flow and inefficient mower designs. Trust Eterra to provide you with an essential piece of equipment for your business that exceeds your expectations.

ADD A CEMENT MIXER B

EXCAVATOR

SKID S

Customer Review: This thing is perfectly amazing. Just yesterday I drilled 168 - 36" round by 36" deep holes for metal building piers. This unit outworked the bit and the skid steer. Wouldn't buy anything else!!! - Cody E.

ABOUT

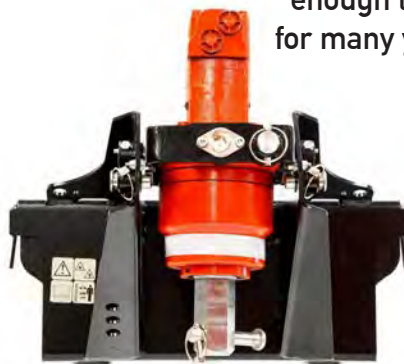

### *Want versatility and durability? Trust Eterra.*

What makes a great auger attachment? Eterra has dedicated over twenty years to answering this question. If you have used augers on your equipment in the past, then you may be well versed in what to expect. You will likely start with the basic features that give it the ability to PERFORM in a specified material.

The auger drive should be strong enough to POWER through the tough and unseen elements below the surface. The drive system should be DURABLE enough to withstand a lot of back-force and it should last you for many years to come. Most common brands manufacturing auger systems provide these essential functions.

Did you know an auger can do even more?
