

# Essential Equipment Guide

Eterra Attachments, LLC.  
2016

## "Clear your own path with a Raptor Skid Steer Boom Mower attachment from Eterra."

### Features:

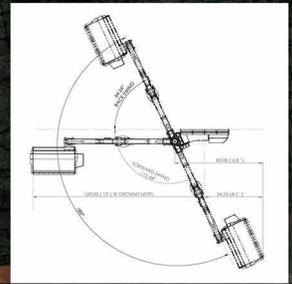

- Completely enclosed front enclosure protects controls and electronics
- Solid tubing for hydraulic lines reduces hose play and damage of hoses when they hang out in the open.
- Advanced hose routing protects your hydraulic circuits better than ever.
- Quick connect mower heads - 48" Rotary, Sickle (3 Sizes), 36" Flail & String Trimmer.
- Wireless Remote Control eliminates wiring from machine to boom.
- Only 1 x 12 volt source needed to run controls.
- Completely interchangeable with different brands and sizes of machines. Run it on one machine today, and a different one tomorrow.
- **Reach:** Boom arm - 10'. 12'6" Reach with flail mower head. 16' reach with 5' sickle head, 18' reach with 7' sickle head, 20' reach with 5' sickle head.
- Hydraulic rotary actuator acts as a break away to protect your boom arm and mower head from damage if the machine hits a stationary object. It resets with the flip of a switch. An actuator allows the operator to cut in the side ways position, and forwards as well as park the arm forward for easier transport.
- Full angle rotation allows the operator to cut flat overhead and angle down deep into ditches.
- The Raptor Boom Mower requires an auxilliary flow range of 15 - 25 GPM, there is no Hi-Flow model available but there are ways to meter your flow to run within the required range. If you are planning to purchase or use a Flail Mower head then you will need a minimum Auxilliary Hydraulic Flow of 17 GPM. Contact us for more details on compatibility!
- Auxilliary Flow Rating of 15 GPM - 25 GPM for sickle heads and 17 - 25 GPM for flail or rotary heads. No High Flow Version Available, however if you can meter your flow, you can set your machine up to run up to the required flow so that you can run your skid steer at a lower throttle and still maintain your mowing ability.
- Enclosed cab to shield the operator from flying debris.

Clear your own path with a Skid Steer boom mower attachment from Eterra. The Raptor Boom Mower is in its third generation, and with hundreds sold, it's a wonder why more contractors aren't aware of this great attachment. Utilize Eterra's wide selection of cutter heads and tool up for the right job. A 48" Rotary Mower head, the Cyclone, removes large limbs and even trees, while Sickle Bar cutters ranging in size from 5 ft. to 9 ft. are great for reaching and removing limbs, brush and grass. Other cutter heads like the 36" Sidewinder Flail mower and the String Trimmer provide an even wider range of clearing and mowing capabilities. Trust the Raptor Boom Arm Mower system to complete the job for you.

Unparalleled Range of Motion

Roadside clearing with an impressive **22 Feet** of effective cutting range

**WE BUILD THESE TOUGH.**

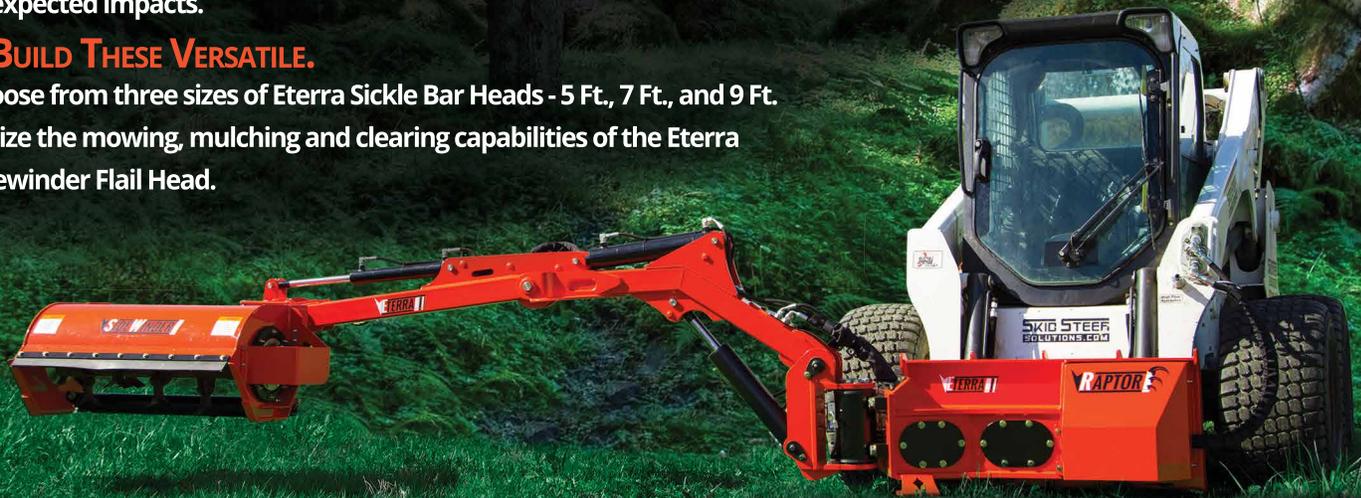

- A world class linear pivot point allows for full angular cutting, and simple boom parking for transport.
- Heavy tubular construction with replaceable bronze bushing pivot points.

**WE BUILD THESE SMART.**

- A proven control system that is not locked into one brand, just add power.
- Modular breakaway system protects your mower, machine and boom from unexpected impacts.

**WE BUILD THESE VERSATILE.**

- Choose from three sizes of Eterra Sickle Bar Heads - 5 Ft., 7 Ft., and 9 Ft.
- Utilize the mowing, mulching and clearing capabilities of the Eterra Sidewinder Flail Head.

## Features.

- 3.3, 9 and 16 Cu. Ft. Mixers have plenty of room to transport with no spillage.
- Galvanized side chute for assisted pouring and a safety grate installed on top.
- A hydraulically operated center chute provides the operator with excellent visibility for pouring.
- A spring assisted side gate locks the gate in place and aids in the actuation.
- The sprocket and chain drive system is completely enclosed and sealed to keep it out of harms way.
- A 5 ft. flexible hose is provided for easy pouring.
- Easy to lift grate makes cleaning with water easy.
- Integrated top bag cutter to make cement bag splitting and dumping easy.
- Steel paddle/auger style drive is suitable for concrete and grout. It mixes just about anything.
- Precision laser cut parts, CNC forming and robotic welding creates a high quality finished product.
- Pad mounting holes for excavators to connect to so this becomes a dual purpose product with just a few turns of a wrench.
- Drive system is reversible so that you can mix and dispense using your hydraulics.
