## AUGER EARTH DRILLING ATTACHMENTS

### AUGER EARTH DRILLS

Planer

Eterra Auger Attachments are versatile, reliable, and easy to maintain when they require it. **Versatile:** How is an auger attachment versatile? The answer is simple. How many auger systems for skid steers or excavators can allow the operator to remove stumps, earth drill, rock drill, and even mix cement? The Eterra auger attachments can. Eterra Auger Drives come with a 5-year warranty against shaft pull out and are built to provide the torque you need to keep working, but to keep working you need a system that will last. Look no further than Eterra.

Multi-machine use design incorporates bolt-on plate system.

Anti-Pullout shaft makes this hydraulic gear drive very resilient. Easy exchanges between machines.

Rotate the mount for use with our Cement Mixer bowl (180 Gal.).

Add a Stump Planer bit to your Eterra Auger attachment for even more productivity.

### FEATURES:

- Use cement mixer bowls, a full range of earth and rock auger bits as well as stump planer bits.
- This attachment is designed, manufactured and made in the **USA**.
- If you add another machine to your job, don't worry because this attachment is cross compatible.
- Bolt on plate system allows for the standard quick attach or excavator coupler and plate to be mounted.
- Polyester powder coat finish gives our Auger the glimmer and protection against the elements that it deserves.
- Attachment plates are available for most mini skid steer, all skid steer loaders, and most excavators.
- Hoses are protected by a ballistic nylon. Flat faced couplers are used standard across all products.
- Hitting tools are manufactured professionally out of hardened steel materials.
